

John Ross, Ph.D., P.E.

Summary

Consulting electrical engineer specializing in electromagnetics, antennas, microwaves, RF and radar. Deep knowledge and experience in antennas. Involved in everything from research & development, to design, simulation, testing, manufacturing and cost reduction. Antenna applications include man pack and re-configurable antennas for the military, automotive AM/FM and SDARS antennas, AM broadcast antennas, high temperature microwave / mm-wave antennas for use inside jet engines and turbine machinery, ultra wide band antennas for medical products, underwater antennas for breast cancer detection, antennas for cancer therapy via microwave ablation, antennas and probes for launching HF and VLF surface waves, and antennas for WiFi and HDTV. Radar applications include aircraft target detection and discrimination via short pulse/UWB waveforms, industrial vibration sensors and detection of foreign object debris (FOD). Current research projects involve RF plasma ignition systems and wireless power transfer methods and systems.

Licensed Professional Engineer with numerous patents, journal, and conference publications. Research in applied and computational electromagnetics, genetic and nature based search & optimization algorithms, smart antennas, automated design software, RF and analog circuits, ultra wide band / short pulse radar, target detection, discrimination and identification algorithms.

Entrepreneur with experience in technology startups, formation, business and technology planning, partnering, market strategy, and capitalization.

Contact Information

Professional Experience

1997- present, Owner, John Ross & Associates, LLC, Moab, Utah

- Consulting engineer in applied electromagnetics, antennas, microwaves, RF and radar.
- Contract R&D, design, analysis, simulation, testing efforts include but not limited to:
 - self-structuring antennas
 - smart and re-configurable antennas for military vehicles
 - broadband high efficiency monopole antennas for military man packs
 - conformal AM/FM antennas and satellite radio antennas for automobiles
 - antennas, amplifiers and accessories for HDTV and WiFi
 - wireless streaming device for HDTV
 - smart antennas for HDTV
 - WiFi and UWB antennas for wireless medical ultrasound units
 - underwater antennas for breast cancer detection
 - antennas for microwave ablation therapy
 - high temperature antennas for use in jet engines and turbine machinery
 - radar detection of foreign object debris in jet engine inlet
 - SAR analysis for medical implant devices
 - VLF surface wave physics and related probes
 - novel plasma ignition systems and traveling wave tube devices

- Clients include small to medium sized businesses, multinationals and government agencies in automotive, consumer electronics, medical, defense and aerospace industries.
- Inventor of numerous iterations of the Clearstream series of HDTV antennas manufactured and sold by Antennas Direct and available nationwide in Best Buy, Walmart, Amazon, Lowes, etc.
- Developed teaming relationships with other small business and universities to successfully win SBIR and STTR contracts. Principal investigator on resultant programs.
- Developed unique and proprietary cross-disciplinary design automation tools for solving difficult coupled design problems involving electromagnetic and circuit analysis.
- Developed proprietary signal processing software to perform spectral and temporal signal analysis and filtering.

2004 to 2008 - Founder & VP R&D, 2008 – 2021, President, [Viamorph, Inc.](#), Moab, Utah

- Lead entrepreneurial effort to create startup-company focused on development and commercialization of new smart antenna technology.
- Forged teaming relationships between large Fortune 100 companies, universities and small businesses.
- Interfaced with top-level corporate and military customers, angel investors and venture capitalists.
- Created business plans and technology strategy to attract Seed Round investment.
- Developed expertise in all aspects of startup operation including company formation, capitalization, intellectual property, licensing, negotiations, employee and investor relations.
- Managed small team of engineering professionals to successfully execute development projects.

2011 – 2019, Owner & Manager, Security Beacon, LLC, Moab, Utah

- Manager and prime contributor to web blog focused on computer, network and digital security issues facing small business and home users.
- Applied research in computer and network security issues, IT services and security consulting for small businesses.

2006 – 2010, Board of Advisers, [Somark Innovations, Inc.](#)

- Adviser on technical strategy, sensors, system design etc.

1996 – 1997, Visiting Assistant Professor, [Department of Electrical Engineering, University of Idaho](#)

- Taught undergraduate courses in Electromagnetic Theory and Microwave Engineering.
- Conducted research in computational electromagnetics and design automation for analog circuits.

1994 – 1996, Staff Fellow, Electrical and Electronics Engineering Department, General Motors R&D Center, Warren, Michigan

- Developed custom suite of software tools to analyze and design vehicular antennas.
- Developed custom software to automate data acquisition in antenna test chamber.

1992 – 1994, Post Doctoral Fellow, [Electromagnetics Laboratory, Michigan State University](#)

- Conducted experimental and theoretical research on radar target detection and identification using ultra-wide band/short pulse systems.
- Designed antennas for a life detection radar system used for earthquake rescue operations.
- Provided direction to graduate research assistants and assisted professors in proposal writing and report preparation for numerous contracts and grants.

1989 – 1992, Graduate Research Assistant, Electromagnetics Laboratory, Michigan State University

- Conducted experimental and theoretical research on transient scattering phenomena related to radar target discrimination.
- Developed free-field transient scattering measurement facility based on vector network analyzer.
- Time domain scattering measurements on ground plane and free-field ranges.
- Significant hands-on experience in transient wave scattering and radiation, instrument control, data acquisition and digital signal processing.

1990, Graduate Teaching Assistant, Department of Electrical Engineering, Michigan State University

- Instructor for off campus graduate level Fourier Optics course including holography and spatial filtering

1987 – 1988, Graduate Research Assistant, Radiation Laboratory, University of Michigan

- Conducted experimental research in millimeter wave remote sensing, polarimetric calibration techniques, scattering properties of natural targets.
- Operated, tested, repaired, and improved a suite of microwave and millimeter wave remote sensing radars and radiometers.
- Developed, designed and built unique Faraday Rotator controller circuit used to accurately change the polarization state of millimeter wave radar.

1985-1987, Graduate Teaching Assistant, Department of Electrical Engineering, West Virginia University

- Taught a junior level digital electronics laboratory, developed new laboratory experiments and projects and assigned final grades.

1984-1985, Assistant Engineer, Illinois Institute of Technology Research Institute, Annapolis, Maryland

- Implemented and tested enhancements to the TIREM (Terrain Integrated Rough Earth Model) program for predicting wave propagation over the earth.
- Developed a program called CCPAM (Cylindrical Conformal Phased Array Analysis Model) for use in antenna and EMC studies.
- Used NEC-2 (Numerical Electromagnetics Code) to perform co-site interference study of Marine Tactical Airborne Operation Control unit.

Education

1988 – 1992, Ph.D. Electrical Engineering, Michigan State University

- Dissertation: “[Application of Transient Electromagnetic Fields to Radar Target Discrimination](#)”
- Course Emphasis: electromagnetics, plasmas, antennas, semiconductors, RF devices, radar
- Department of Electrical Engineering Fellowship 1988 - 1989

1987 – 1988, Graduate Study, Electrical Engineering, University of Michigan

- Emphasis: microwave and millimeter wave remote sensing, lasers, optics.

1985 – 1987, M.S. Electrical Engineering, [West Virginia University](#)

- Thesis: "[AM Broadcast Antenna Engineering](#)"
- Emphasis: electromagnetics, electrodynamics, antennas

1982 – 1984, B.S. Electrical Engineering, [West Virginia University](#)

- Senior Project: "Optical Density Measurement System"
- Emphasis: RF Engineering and Antennas
- Eta Kappa Nu Electrical Engineering Honorary

1980-1982, A.A. Engineering, [Potomac State College](#)

- Computer Simulation of Mechanical System
- Mathematics Achievement Award

Registration & Licenses

- Licensed Professional Engineer in Utah #354136-2202
- Licensed General Class Amateur Radio Operator KC7WVD

Professional Memberships

- [Institute of Electrical and Electronics Engineers](#) - Senior Member
- [Applied Computational Electromagnetics Society](#)
- [National Society of Professional Engineers](#)

Awards and Scholarships

- Edward S. and Sarah J. Moran Scholarship 1980-1984

Computer Skills

- FORTRAN, Visual BASIC, MatLab, Python programming, instrument control via GPIB
- Linux, Windows, TCP/IP Networking, hardware configuration and troubleshooting

11. [C. Feit, J.E. Ross, R.E. Schneider, "Antenna," US D888,697, Aug 4, 2020.](#)

12. [C. Feit, J.E. Ross, R.E. Schneider, "Antenna," US D888,694, June 30, 2020.](#)
13. [C. Feit, J.E. Ross, and R.E. Schneider, "Antenna," US D883,265, May 5, 2020.](#)
14. [J.E. Ross and R.E. Schneider, "Antenna", US D883,264, May 5, 2020.](#)
15. [J.E. Ross and J. Nosiglia, "Antenna and Base Stand," US D881,172, Apr 14, 2020.](#)
16. [C. Feit, J.E. Ross and R.E. Schneider, "Antenna," US D868,720, Dec 3, 2019.](#)
17. [J.E. Ross and J. Nosiglia, "Antenna", US D868045S1, Nov 26, 2019.](#)
18. [J.E. Ross and R.E. Schneider, "Antenna", US D867,347, Nov 19, 2019.](#)
19. [J.E. Ross and R.E. Schneider, "Antenna Element," US D827,620, September 4, 2018.](#)
20. [J.E. Ross and R.E. Schneider, "Antenna Element," US D824,884, August 7, 2018.](#)
21. [C. Feit, J.E. Ross, R.E. Schneider, "Antenna", US D815,073, April 10, 2018.](#)
22. [J.E. Ross, J. Nosiglia, C. Hand, "Picture Frame Antenna", US D811,752, March 6, 2018.](#)
23. [C. Feit, J.E. Ross, and R.S. Schnieder, "Antenna", US D809,490, February 6, 2018.](#)
24. [C. Feit, J.E. Ross, and R.S. Schneider, "Antennas", US D804,459, December 5, 2017.](#)
25. [R.E. Schneider, J.E. Ross, C. Feit, D. Picolet, "Antenna", US D666,178, August 28, 2012.](#)
26. [R.E. Schneider and J.E. Ross, "Antenna element," US D604,276, November 17, 2009.](#)
27. [R.E. Schneider and J.E. Ross, "Double tapered loop antenna element," US D598,434, August 18, 2009.](#)
28. [R.E. Schneider and J.E. Ross, "Tapered loop antenna element," US D598,433, August 18, 2009.](#)
